SERIOUS

DUCKS!

CEO of one of the world's biggest oil and gas companies...

I don't care if it's a boy
duck, or a girl duck...

I just want eggs!

Execs only care about outcomes

Egg-secs

~~Execs~~ only care
about outcomes

Big idea:

2x

the ROI from your
portfolio

The Return-o-matic

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

Where are we as an industry?

49% of projects unlikely to meet business goals

“What does the PMO actually DO?”

“We couldn't operate without our PMO!”

Project failure rates are too high!

Figure 6: Project Performance Metrics

Failed, budget lost!

**6 OR 7
OF YOUR
JOURNEYS TO
WORK EVERY
MONTH**

TransparentChoice.com _____

**END
LIKE
THIS**

Where are we as an industry?

49% of projects miss
business goals

“What does the PMO
actually DO?”

“We couldn't operate
without our PMO!”

Where are we as an industry?

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

49% of projects miss
business goals

58% of projects are late

Where are we as an industry?

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

49% of projects miss
business goals

58% of projects are late

60% of projects are
over budget

Where are we as an industry?

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

Where are we as an industry?

“What does the PMO actually DO?”

“We couldn’t operate without our PMO!”

Do-able?

2x

the ROI from your
portfolio

○ ○ ○

○ ○ **Mike Hannan**

ToC / project flow wunderkind!

State gov't, 700 person IT org
2x in one year
3x in 18 months

Telecom, 6,000 person IT org
2x in 1 year
3x in 2 years

.....

Mike Hannan
CEO, Fortezza Consulting

Surprise!

the path to

2x

is not what you
think... probably

Introducing the world-famous ducktective...

Sherduck Holmes!

First clue...

- ○ ○
- ○
-

THE USUAL APPROACH IS NOT WORKING!

Figure 6: Project Performance Metrics

The PPM market is around \$7bn

PMI's revenue ~\$343m

-
-
-
-
-

You cannot “project management” your way out of this!

Figure 6: Project Performance Metrics

PMI data compiled at <https://www.workamajig.com/blog/project-management-statistics>

Second clue...

Duckter
Watson

Delays
Cost over-runs
Project failure

Multi-tasking
reduces
efficiency

Resource
contention
delays projects

Delays

Cost over-runs

Project failure

Too many
projects

Multi-tasking
reduces
efficiency

Resource
contention
delays projects

Delays

Cost over-runs

Project failure

Ineffective prioritization

Too many projects

Multi-tasking reduces efficiency

Resource contention delays projects

Delays
Cost over-runs
Project failure

Let's look at the root cause of project "failure"

Laura
Barnard

PMO Global Alliance
Influencer of the year

Host of PMO IMPACT
Summit

Third clue...

Portfolio management is the differentiator

~90%
CONSISTENTLY

~65%
more projects
delivered on
time

~32%+
fewer projects
over budget

~31%
more projects
delivering
business
benefit

It's elementary,
dear Watson!

Portfolio governance /
planning / management
is the key!

We know it's possible... but
how can we save the
day?

With the help of some super-heroes, of course.

INTRODUCING..

The Eggvengers!

20% WASTE

According to the PMI, 20% of projects are so badly aligned with business goals that they should be stopped.

AHP is the right tool

Analytic Hierarchy Process

Recommended by Decision
Scientists

Use the right tool

\$10m investment

\$2m waste

Expect, say, 3x ROI

\$6m lost value

Where we started

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

AHP based prioritization saves money, deliver better eggs!

“What does the PMO actually DO?”

“We couldn’t operate without our PMO!”

Moving your
strategy forward!!

Keep the lights on /
mandatory projects

Moving your strategy forward!!

2x

Keep the lights on / mandatory projects

0%

UTILIZATION OF
RESOURCES

30%

UTILIZATION OF
RESOURCES

100%

UTILIZATION OF
RESOURCES

Business value delivered.

Business value delivered.

More

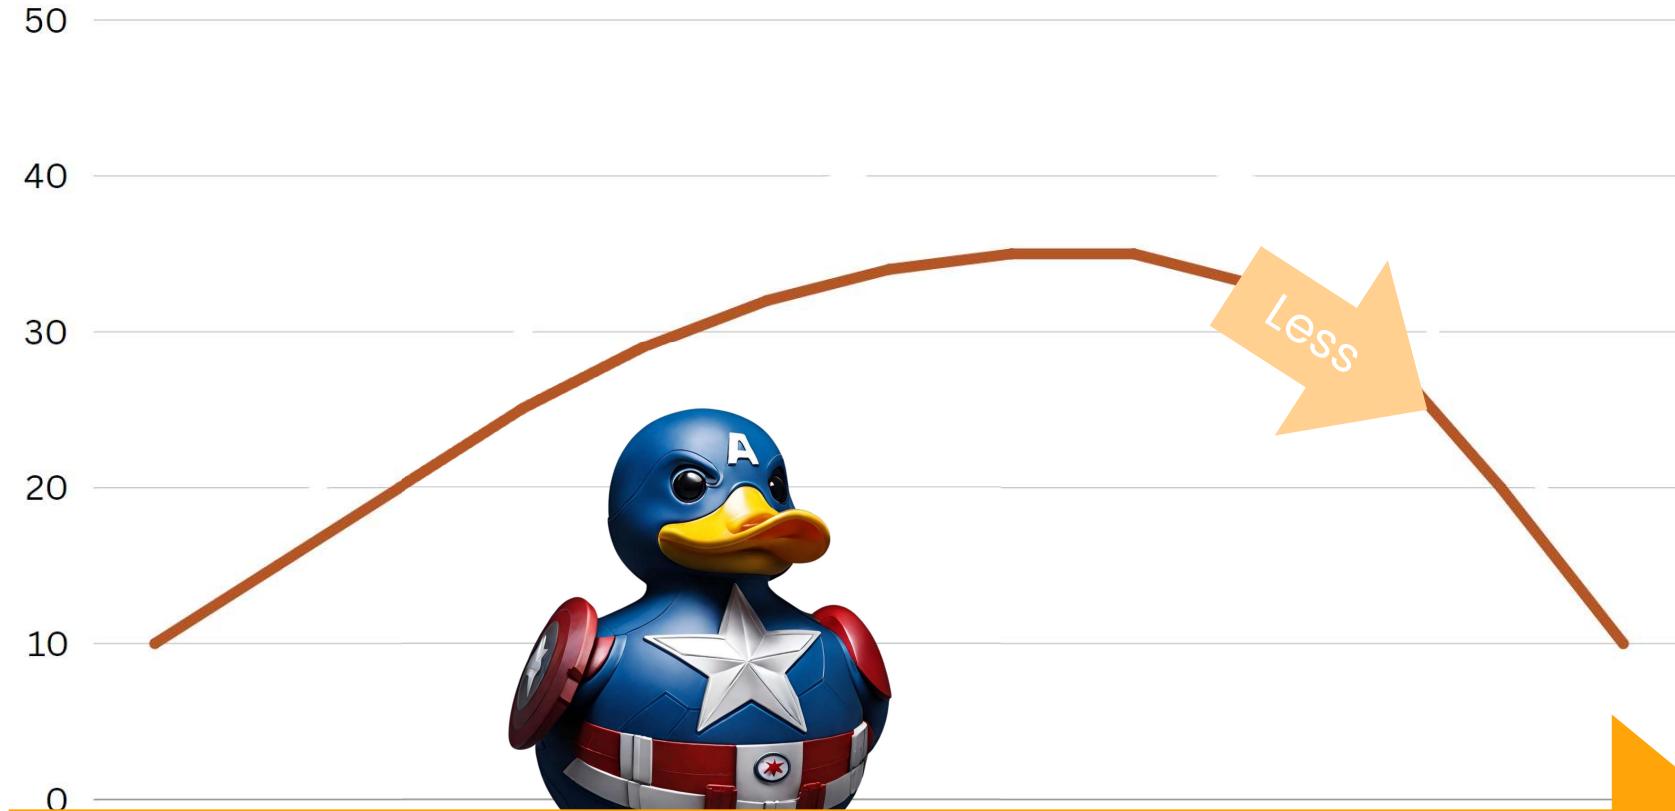

Resource utilization rate.

Business value delivered.

Resource utilization rate.

Business value delivered.

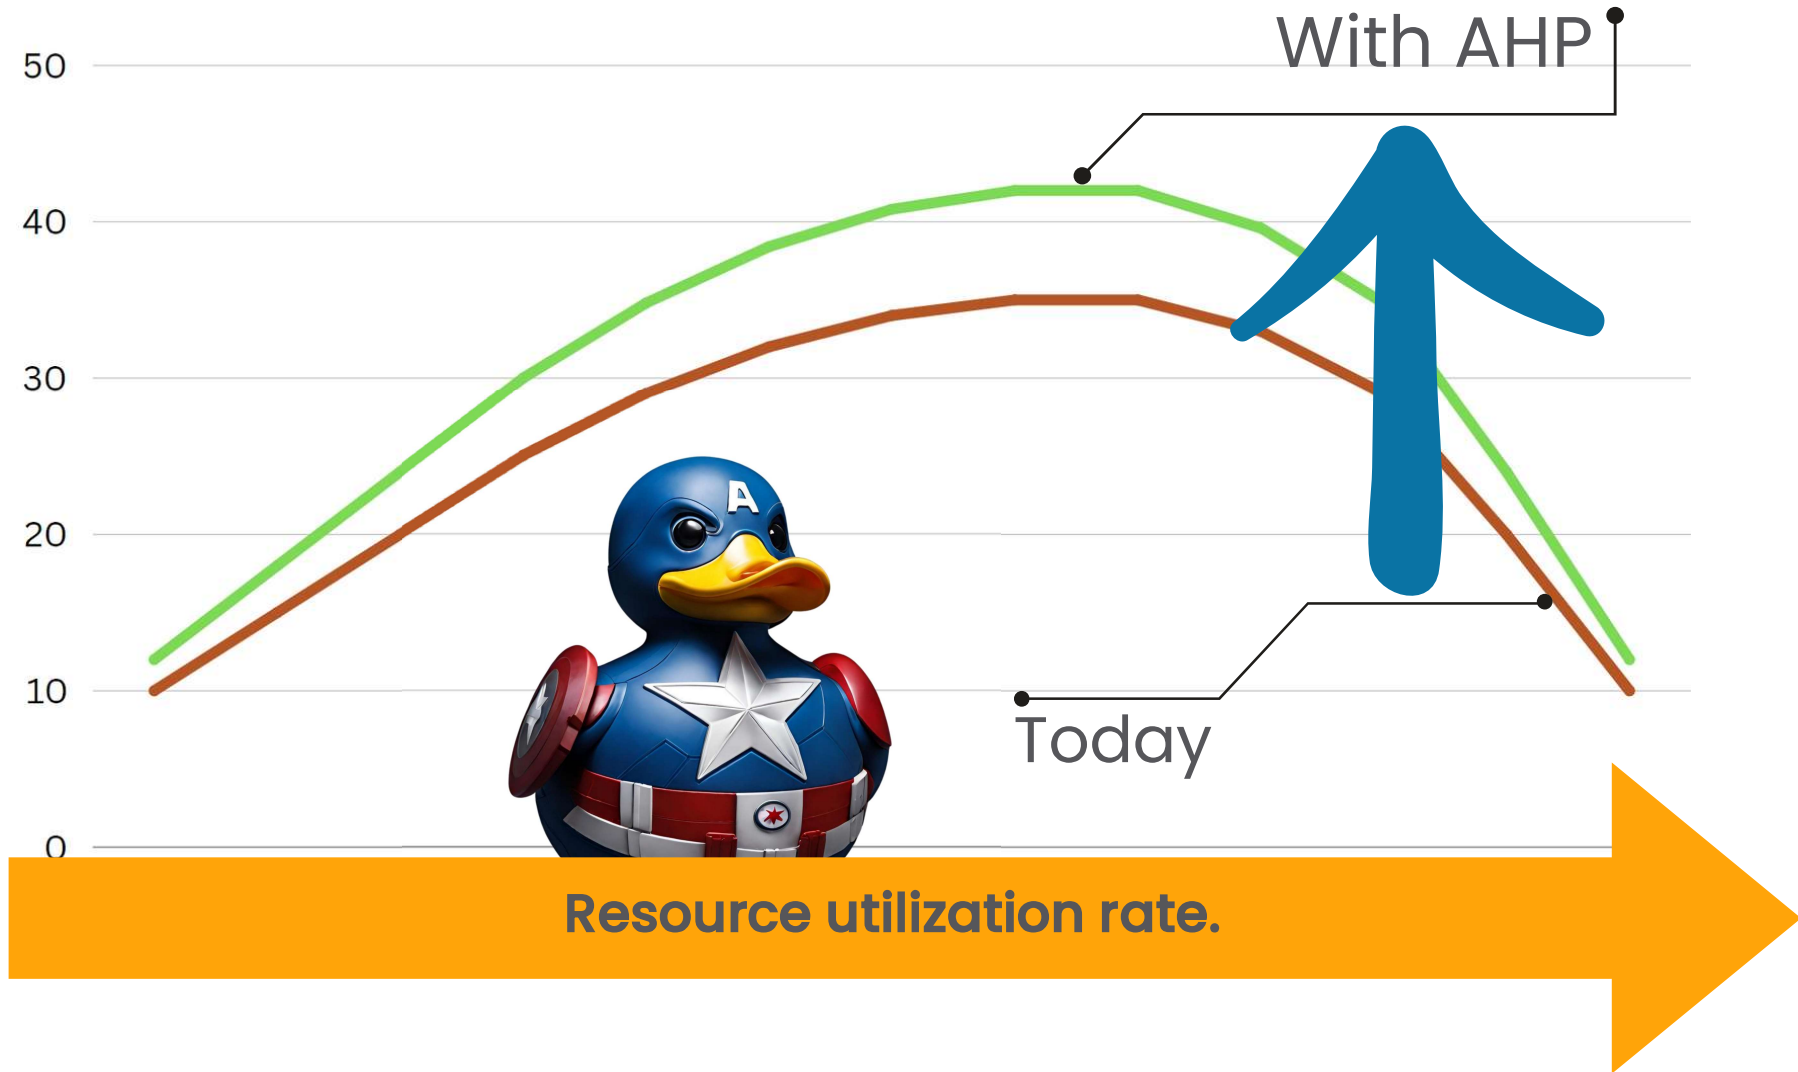

Resource utilization rate.

Business value delivered.

Resource utilization rate.

Business value delivered.

Resource utilization rate.

And One More Thing...

transparent
choice

The POWER of staggering projects

Everything starts on day 1

Task switching is inefficient...
...REALLY inefficient

Value doesn't come until really late!

The **POWER** of staggering projects

Based on the work of Mike Hannan at <http://www.fortezzaconsulting.com/>

AHP based prioritization saves money, deliver better eggs!

“What does the PMO actually DO?”

“We couldn’t operate without our PMO!”

Top-of-a-higher-hill and staggering deliver staggering value!

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

Moving strategy forward!!

Keep the lights on / manage projects

2x

Moving your strategy forward!!

Keep the lights on / mandatory projects

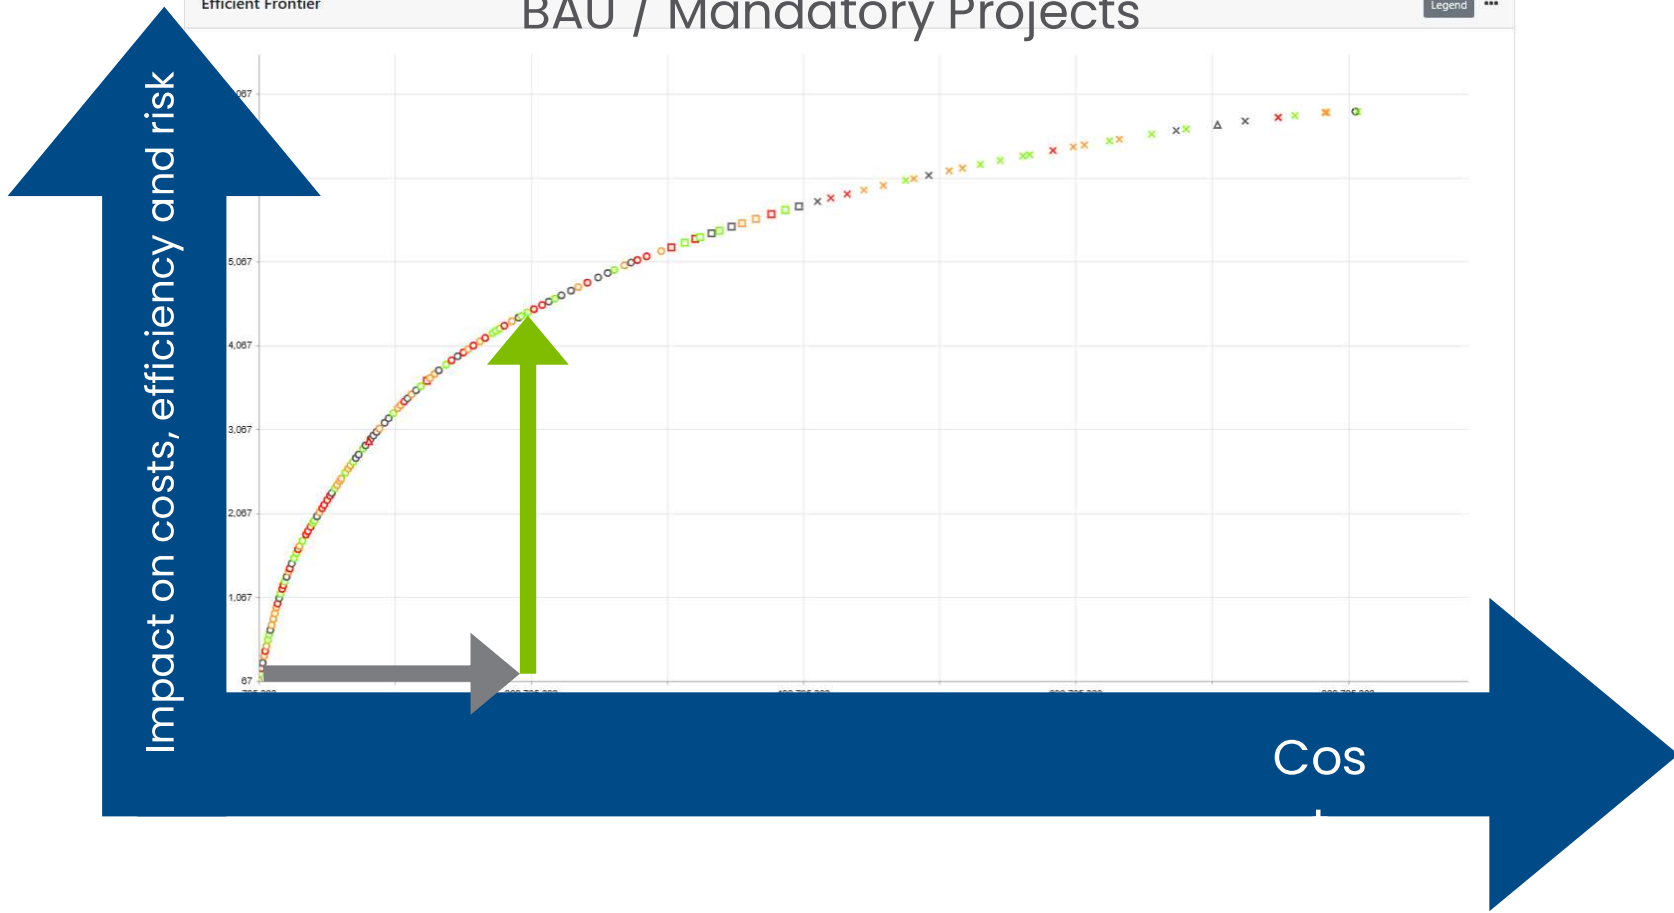

3x

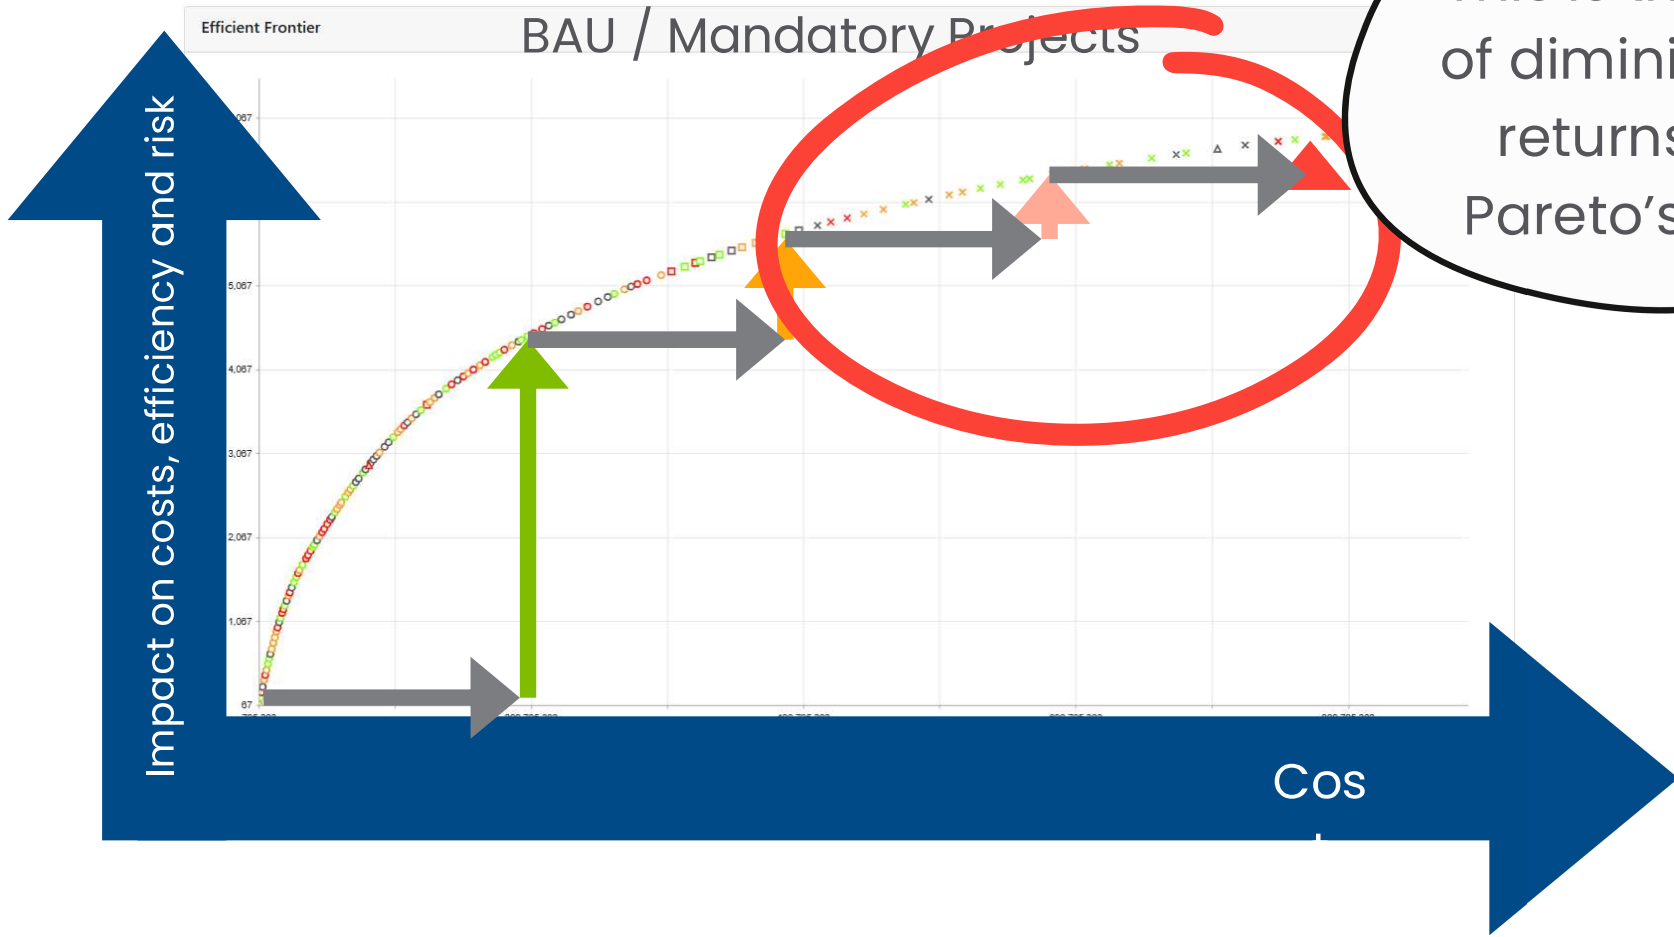

Reducing cost /
boost efficiency

Reducing risk
(inc. "mandatory" projects)

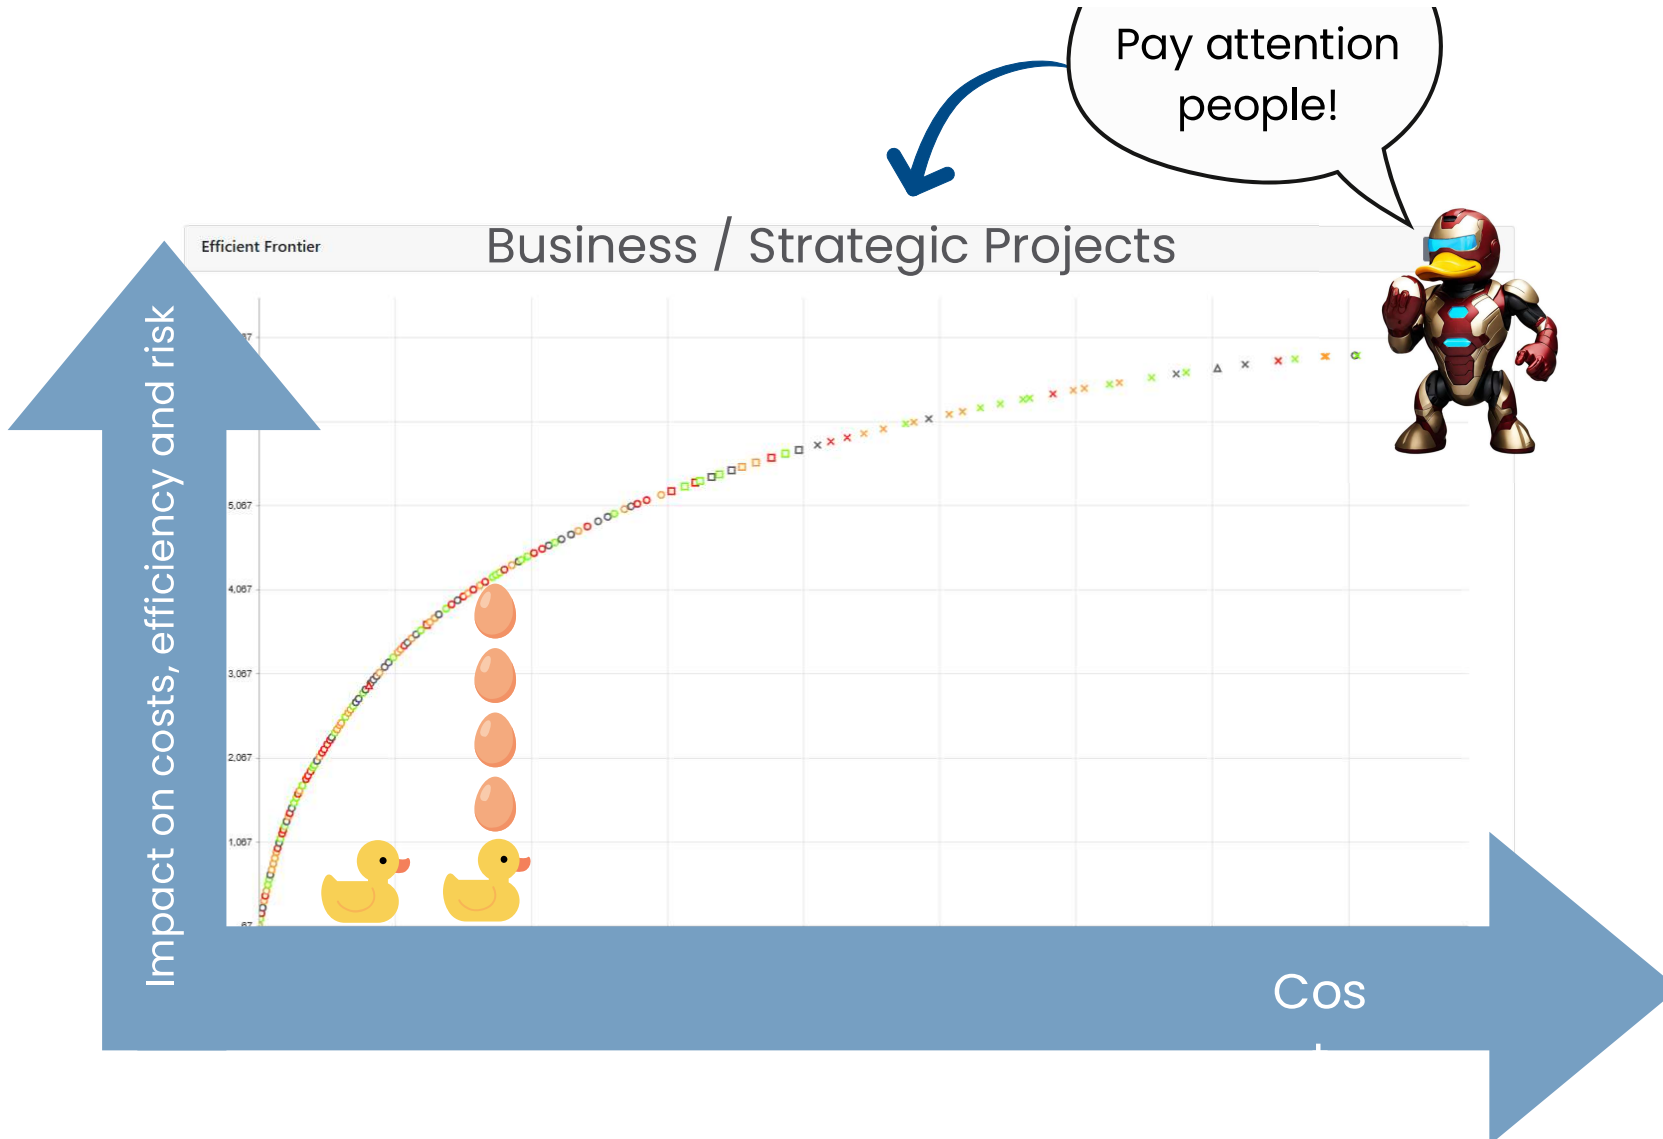

This is the law of diminishing returns, or Pareto's law.

Doing 10 ducks worth of projects

Getting 8 eggs worth of value

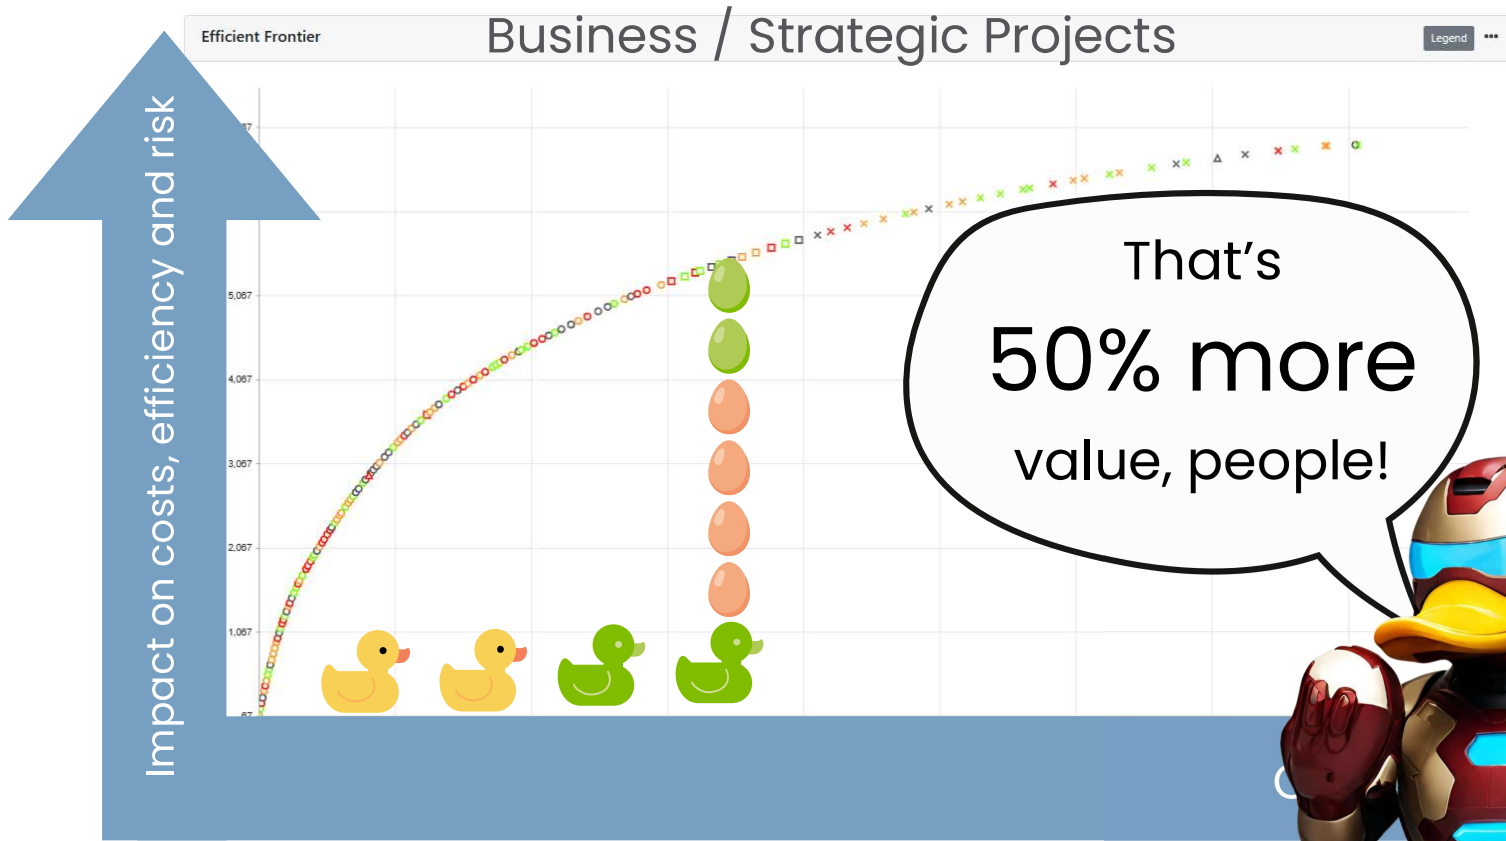

Doing 2 ducks worth of projects

Getting 4 eggs worth of value

What if we only did 8 ducks worth of projects?

We only lose HALF an egg!

Now we have 4 ducks worth of projects

Delivering 6 eggs of value

Top-of-a-higher-hill and staggering deliver staggering value!

“What does the PMO actually DO?”

“We couldn’t operate without our PMO!”

Pushing down the waterline pushes up the ROI... Bigtime!!

“What does the PMO
actually DO?”

“We couldn’t operate
without our PMO!”

And it's all about portfolio management

2x

Reduce waste

Top-of-a higher hill

Staggering

Push down the water

Time to hatch a plan
